BIOGRAPHY

Coming from Argentina, Luca is a tanned artist and musician whose trajectory goes back in the beginning to his personal experiences in the context of hard rock and metal, reaching his time to even play as a vocalist founded on several metal bands.

However, in his walk and constant exploration, an interest is generated in him to deal with his talent, an area and context unknown until then: the commercial world of music. thus conquering a flow of experiences that would lead to interpretations and presentations in Argentine territory.

It would be in 2015 when he would radically turn his career and identity as an artist. Attracted by loud and forceful techno sounds, Luca explores a new dimension of possibilities, thus making

the decision to start a great path in the electronic industry by developing as a DJ and producer. Being the latter, a major focus of his interest and international projection by having a particular and characteristic sound in his original creations, an amalgam between dense techno environments, conducted in elaborate synths along with enveloping percussions.

Along this few years of electronic music development he has reached highs goals such as signing his music at big top 10 labels, such as IAMT from Spartake, SayWhat from Ramon Tapia etc., being selected by Beatport as best techno Hype track of June of 2021 with Faraway (original mix), supported by many artist such as Mark Shultz among others and being hired from the main Argentina clubs such as Bahrein, Crobar etc.
